BUILDING SYSTEMS

What our customers have to say!

**Dave Gardiner, Gardiner Farms
82' x 120' Commodity Storage**

"We needed a building with great height where we could dump our trucks inside. They provided us with the right height for the right price."
- Dave Gardiner

**Can Grow Crop Solutions, Ray McDonald
40' x 84' Storage Building**

"The fabric covered building is exactly what we needed for storage. It is a very efficient way to light the building and the high ceiling that the building provides is perfect for stacking our products. Also, the wood sides on the building provides us with low maintenance. Our local dealer was fast and efficient and very professional to work with and they left the job site looking clean" - Mike, Can Grow Crop Solutions

**Whaling Poultry Farm Ltd., Mike Whaling
72' x 140' Equipment Storage with 30' x 18' & 40' x 18'
overhead doors**

"I have never had a place to work in like this before. The light is wonderful even on a dull day. With the height of the building we can stand on top of the equipment and work. The local dealer was great to work with. We should have built it years ago." - Mike Whaling

*Buildings were constructed by dealers representing BRITESPAN
